Installation manual for dimmable LED light products

Thank you for shopping at LEDcentre.uk.com

We would like to help your electrician with the installation.

Operating Voltage: 220-230V AC, mains.

Our 220V **dimmable LED light bulbs** are only **compatible with traditional, TRIAC** type of **dimmers**. TRIAC dimmers operate with the turn of a knob or move of a slide. Electronic dimmers (operating with touch or push button) ruin LEDs. **There is no warranty for our LED dimmable lights used electronic dimmers.**

The LEDcentre does not take any responsibilities for personal injuries or damage of the goods caused by incorrect installation. Installation must be carried out by qualified persons.
