Introduction

LEDcentre.uk.com offers a great range of low and main voltage eco-friendly, energy efficient and cool running LED lights, ideal for homes, offices, shops, boats or caravans. All our LED products come with two years UK warranty, shipped anywhere within the UK. The LED models are always developed to meet the growing demands of the market and are available for both retail and wholesale. <http://www.ledcentre.uk.com>

Please visit our website and if you are interested in any of our products do not hesitate to contact us.

GU10 Fitting

Twist and lock your new LED lights instead of the energy-hungry halogens!

Our GU10 LED spot lights are ideal for creating main, decor, mood and ornament lighting. These spot lights vary in colour or colour temperature (available in bright and warm white, RGB, blue, green, orange and red colours); various performances (low power, SMD power and high power); and with various quality chips determining the brightness and the life-span of the products.

Although all GU10 lights have the appearance of spot lights, we also distribute GU10 lights with a wider beam angle of 120° to real spot lighting of 40-60° angles.

Dimmable GU10 spot lights are also available with stepless dimming function and decorative mounted or remote control dimmers. GU10 lights run at 230V mains.

B22 and E27 Fitting

B22 and E27 lights are simple to exchange. Just push and twist your LEDs and watch your electricity bill drop!

B22 and E27 LED lights are available in traditional bulb and candle light forms, and they allow you to instantly replace your ordinary light bulbs with an 80 - 90 % less energy consumption. They run at 230V mains, and provides diffused light.

These light bulbs are available in three colour temperatures: bright, warm and natural whites, creating different atmosphere in your home. With their various performances, these lights are suitable for main lighting as well as mood or task lightings.

MR16 and MR11 Fittings

Your home has 12V? Our MR11 and MR16 spots will still provide you a green change for energy-saving LED with a single step.

These LED lights, running at 12V, and are ideal where main 230V is not an option, like in cars, motorways/caravans, boats, ships, etc. Their performance, colour and brightness are varied, with lights suitable for main lighting, but also mood and task lighting, sometimes also with dimmable function.

MR11 and MR16 fittings only differ in size, but both types of products have the appearance of spot lights. However their beam angle varies from 25° to even 120° angles, spreading the light emitted widely in the room.

G4 Fitting

Replace your inefficient and hot halogen lights with cool running, 12V energy saving G4 LED lights!

Cool running, energy efficient, low cost G4 LED lights are to replace G4 halogen lights. G4 LED lights are recommended as energy conserving lighting solutions operating at 12V DC, used in homes, cabinets, caravans, boats, etc. The LED G4 lights have the same two pin (GU5.3) fittings as halogen G4 lights. They are available with various performances and with side-pin, back-pin and capsule solutions.

LED Strips

Take a look at our 12V LED strip lights and modules making your life brighter and more colourful!

LED strips are available in two different performances. The SMD 3528 strip lights are perfect for decorative, edge or cabinet lighting. You can also use it in kitchens, bathrooms or in gardens excellent for both indoor and outdoor use. Choose from seven different colours or get the colour changing version.

The SMD 5050 strips have a higher performance and are suitable for task and main lighting as well. They are recommended for bright local lighting to illuminate worktops, shop windows, cabinets, etc.

Both types of strip lights are flexible and operate at 12V DC.

Power supplies, accessories

Take a look at our range of power supplies and accessories like dimmers, amplifiers or RGB controllers. We provide dimmers with remote controls, and a wide range of power supplies with all kinds of performances. If you are not sure, which power supply you need, we are happy to help you. All our current power supplies transform 220V to 12V.

Payments and Delivery

UK Orders:

Payments can be made by all major credit/debit cards or by PayPal. (PayPal account is not required to complete payments. Simply click on "continue" button above the card logos). You can also pay BACS or direct money transfer to our account, please e-mail us for account details.

Delivery:
